## Normandale Neighborhood Roadway Reconstruction

Dear Resident:

The following is a quick update of the project in your neighborhood:

### Neighborhood Reconstruction Schedule – Stage 1 (Sherwood and Ryan Avenues, and Parnell Avenue north of 64th Street)

Next week, crews will add topsoil and repair irrigation systems. If you have an irrigation system requiring repair, please contact Premiere Lawn's Joe Bartusek at 952-292-5370 or [PremiereLawn@gmail.com](mailto:PremiereLawn@gmail.com). He is a subcontractor of Northwest Asphalt Inc. and will coordinate the work.

Crews will also raise manhole castings up through the new asphalt to regain access to them.

### Neighborhood Reconstruction Schedule – Stage 2 (Parnell Avenue south of 64th Street and West Shore Drive)

Crews will continue working on sanitary sewer and water mains.

To complete the water main work, the water to your home may be temporarily shut off. If the shutoff affects you, crews will notify you one day in advance by hanging a notice on your front door with the anticipated shut-off time and duration. Crews will work to get the water system turned back on as soon as possible.

The location of the work may cause you to not have access to your driveway. You will be notified accordingly if you are affected. Crews will make every effort to limit the number of times this occurs.

The work may cause rust-colored water to come out of your faucets. This is normal and the water is safe to drink, though you should wait until the water is clear again before doing a load of laundry. Flush all your faucets at the same time to remove the reddish color, beginning with the laundry room sink.

An above-ground, temporary water service pipe will be installed in the backyards to three houses in the Parnell Avenue cul-de-sac and two houses on 66th Street. The pipe will temporarily supply water to the homes while crews complete water main repairs. You will be contacted to coordinate hooking up the temporary water service pipe to your home. The contractor may need to enter these homes to operate the water shut-off valve in the basement. Affected homes will be notified using a doorknob hanger on a case-by-case basis. Please be careful when cutting grass near the temporary water service pipe. This work may happen late next week or the following week.

### Communications

For detailed information about the project, visit

[www.edinamn.gov/construction\\_normandale\\_reconstruction](http://www.edinamn.gov/construction_normandale_reconstruction). The City of Edina and Northwest Asphalt thank you for your patience and cooperation throughout the project.

Regards,

Joe Clement, SEH
